

Students Rebuild is a collaborative program of the Bezos Family Foundation that inspires young people to connect, learn and take collective action on critical global issues. Since 2010, we've mobilized thousands of young people in nearly 80 countries and donated more than \$2.5 million in matching funds to rebuild in Haiti, Asia and Africa—all because students took a stand.

Our Challenges require young people to create a simple, symbolic object which the foundation matches with funding to worthy causes. This allows students of all ages, backgrounds and in countries around the world to take action and see change on international concerns.

## Haiti Schools Challenge

We launched our first Challenge after the devastating January, 2010 earthquake. In partnership with Architecture for Humanity (AFH) and Global Nomads Group (GNG), students supported rebuilding four new schools.

## The Paper Cranes for Japan Challenge

We partnered with DoSomething.org and AFH after the March, 2011 earthquake and tsunami. Challenge teams from 39 countries wildly exceeded our 100K goal and mailed in an astounding *two million* paper cranes which we matched with \$500K to rebuild in the Tohoku region of Japan.

## One Million Bones Challenge

We joined the One Million Bones project, CARE, GNG and students worldwide to create 1,000,000 handmade clay and paper bones. In June, 2013 we laid this visible petition against humanitarian crises on the National Mall in Washington, D.C.—and matched the bones with \$500K for CARE's work with youth recovering from conflict in Somalia and the Democratic Republic of Congo.

## Water Challenge

We partnered with charity: water and GNG to bring clean, safe water to Tanzania. Student teams in 25 countries mailed in 800K paper beads. This blew away our 323K goal and resulted in \$500K in matching funds for building water projects that serve more than 16,000 Tanzanians.

## Typhoon Haiyan Challenge

After a powerful typhoon struck the Philippines in November, 2013, student teams submitted letters of hope and healing to youth impacted by the storm. We matched these mailings with a \$200K donation to Save the Children's relief efforts.

## Literacy Challenge

We joined Save the Children and GNG to promote life-long reading and learning for children in Mali, Peru and Nepal. Teams in 46 countries participated! We matched each bookmark we received with \$1—for a total of \$300K—to support Save the Children's Literacy Boost program.

## Flowers for Nepal Challenge

After the destructive April 25, 2015 Nepal earthquake, we matched every garland of non-perishable flowers youth made and mailed in with \$2. Save the Children used the final donation of \$200K to provide children with temporary schools, back-to-school kits and other support.

## Healing Classrooms Challenge

Join our current Challenge with the International Rescue Committee (IRC) and GNG to support Syrian children. We'll match every pinwheel you make and mail in with \$2—up to \$400K—for the IRC's *Healing Classrooms* program to help children from conflict areas recover from crisis and grow into happy, healthy adults.
